The route to comprehensive protection

Have you already started on the road to innovation? Perhaps your project is still in its infancy, or perhaps you are well on your way towards realising your innovation goals. Either way, you're not the only one, or are you? Are there other people with similar ideas? What are their rights? How much freedom do you have, and how are you going to protect it all?

At EP&C, we will help you set your course. We will help you to identify the rights of others and ensure that your innovation is not in infringement. In such cases, we will help you guide your innovation towards quieter waters, where you have the rights and the freedom you need to innovate. Even if this means curtailing your rights.

The result is always solid and comprehensive protection for your Intellectual Property. Protection that will command respect from others and provide the ideal starting point for issuing licences to business partners.

EP&C has a strong team of more than 30 certified attorneys who are qualified to offer IP representation in the Netherlands and in Europe. Each attorney has an academic background and technical specialism, years of experience, and a network of business partners that reaches far beyond the boundaries of Europe.

Marcel Kortekaas, M.Sc.
Chemical engineering

Dutch & European Patent Attorney

Partners in effective innovation

Setting our sights

We like to use our knowledge and experience as a catalyst in helping your business and your innovations succeed. This is why we like to start by discussing your wider ambitions and business objectives, so that we can adjust our sights to meet yours.

Putting quality first

Just as you only get one shot at a patent application, we only get one shot at providing you with the right support and advice. This is why quality comes first, with teamwork as our driving force.

Meticulous and inquisitive

Our patent attorneys are inquisitive and meticulous. Their goal is to understand your innovation and technology, to understand the language of the inventor and translate it into solid and comprehensive protection.

Reliable partners

Our aim is to develop long-term and reliable partnerships. This calls for openness from both sides, with quality as its reward. We are honest and realistic and we do not measure our success on the number of patents we write.

Solution-driven

We are used to dealing with areas of technologies in which a great many patents have already been granted. With plenty of obstacles on route, there is often little room to manoeuvre and little margin for protection. This is our forte, however, and our attorneys will help you navigate your way to the right solution.

Keeping it simple

Patent law is complex and we consider it our responsibility to provide you with step-by-step guidance and information that will help you expand your knowledge and understanding of Intellectual Property rights.

LIFE SCIENCE & FOOD
